BCA student specializing in Machine Learning and AI, with hands-on experience building applied ML systems spanning computer vision, audio classification, risk prediction, and LLM agents. Seeking an ML/AI Engineer role.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, HTML, CSS, Node.js

ML / AI: Machine Learning, Deep Learning, NLP, Computer Vision, LLM Agents

ML Frameworks: PyTorch, scikit-learn, YOLOv8, MediaPipe, OpenCV

Tools & Platforms: MongoDB, Power BI, Git, GitHub, REST APIs, Docker, GitHub Actions

Core Competencies: Model Development, Data Preprocessing, Feature Engineering, Model Evaluation & Testing, Data Visualisation

EXPERIENCE

Full Stack Development Intern — Infidata | May 2026 – Jul 2026

- Contributed to the design, development, and testing of a full-stack web application as part of the development team.
- Built and integrated front-end and back-end components, gaining hands-on experience with real-world software workflows.

PROJECTS

Research Agent | Personal Project | 2026

Python, Anthropic API, Gradio, Web Search Integration | research-agent-qz2t.onrender.com

- Built an autonomous research agent (plan → research → write → verify → revise) producing cited, fact-checked reports for open-ended questions.
- Designed a verifier that cross-checks every claim for a faithfulness score, and a 34-test offline mock mode for zero-API-key CI.

AI Guardian — Women's Safety Platform | Personal Project | 2026

Python, PyTorch, scikit-learn, YOLOv8, MediaPipe, FastAPI, React, MongoDB, Docker | ai-guardian-women-safety.vercel.app

- Engineered a multi-modal safety system: PyTorch CNN scream detection, RandomForest risk classifier, MediaPipe gestures, YOLOv8 weapon detection.
- Built a one-tap SOS system with WebSocket alert broadcasting and role-gated dashboards; containerized with Docker Compose and GitHub Actions CI.

MediCare — Hospital Management System | Personal Project | 2026

Render, Vercel, React, MongoDB, Node.js, Express, JWT, Vite | hospital-management-eight-snowy.vercel.app

- Built a full-stack MERN platform with role-based access for admins and patients covering appointments, records, prescriptions, and billing.
- Hardened the REST API with JWT auth, rate limiting, and XSS protection; deployed backend on Render and frontend on Vercel.

EDUCATION

Bachelor of Computer Applications (BCA) — Presidency College, Bengaluru | 2024–2027 | CGPA: 8.22/10

Relevant Coursework: Data Structures, DBMS, Web Technologies, Python Programming, Statistics for Data Science

CERTIFICATIONS

- Basics of ML Algorithms — UniAthena × Cambridge Intl. (Aug 2026)
- Exploratory Data Analysis — NASSCOM FutureSkills (Jul 2026)
- OpenAI GPT Models — Infosys Wingspan (May 2026)
- Data Science — Infosys Wingspan (May 2026)
- Cybersecurity Foundations — LinkedIn Learning (Aug 2026)

ADDITIONAL INFORMATION

Languages: Hindi & Odia (Native), English (Professional), Kannada (Conversational) | **Interests:** Open-source, AI for social good, women-in-tech
